Profile

I have gained valuable experience in understanding how businesses operate through my work in releasing and solving various business tasks, particularly in the realm of building websites. I recognize that not everything goes according to the initial plan, even when following a structured framework like Figma's website structure(In addition, I excel at website development using Figma, creating visually appealing and user-friendly designs that meet objectives and user expectations). In such situations, I have learned the importance of proactively finding solutions to ensure that the business functions effectively and begins generating profits.

I possess a profound understanding that there are areas in which I still have much to learn. This realization fuels my unwavering motivation to actively pursue new knowledge and acquire additional skills. I am deeply committed to engaging in continuous learning and expanding my expertise in various domains.

Employment History

IDF

FEBRUARY 2021 — MARCH 2023

During my time in the army, I had the opportunity to collaborate with experienced programmers on web design projects. This experience greatly enhanced my skills in various areas, including front-end and back-end development, JavaScript, React, HTML, CSS, MongoDB, and Java. Each week, I was assigned diverse tasks that allowed me to continuously learn and grow. Additionally, working as part of a team taught me valuable lessons on effective collaboration and cooperation.

Education

Ort Singalovski, Tel Aviv

OCTOBER 2022 — AUGUST 2023

I have been working on my personal website blog while also pursuing other projects. I worked on a college project similar to "Wolt," created a New Year's website, and developed a Todo list. Additionally, I wrote a website using HTML, Bootstrap, and JavaScript. During my military service, I also performed various tasks such as interface redesign and code migration.I also undertook a project primarily focused on backend development, specifically centered around the theme of an atlas.

The school named after Bauyrzhan Momyshuly., Almaty

2007 — MAY 2018

During my time at school, I studied the fundamentals and basics of programming, delving into topics such as algorithms and logarithms. I acquired a solid understanding of programming principles and learned how to apply them in practice. Additionally, I gained knowledge in other areas related to computer science, broadening my understanding of the field.
